Class X

06/2015- 03/2016

Percentage: 79.16%

TECHNICAL SKILLS

HTML || CSS || Sass CSS || Bootstrap || Tailwind CSS || JavaScript || React.js || jQuery || Material UI || Media Queries

EXPERIENCE

Bestpeers Infosystem

Web Designer

January 2025-Present

- Designed and maintained responsive, scalable websites using HTML, CSS, Tailwind CSS, and JavaScript.
- Contributed to **SaaS-based web applications**, focusing on clean UI design, performance optimization, and cross-device responsiveness.
- Implemented custom CSS styling and leveraged Tailwind CSS utility classes to build consistent, reusable UI components.
- Applied modern **gradient effects** and smooth transitions to enhance visual appeal and user experience.
- Utilized **Material-UI (MUI)** to develop professional, accessible, and cohesive interfaces aligned with product requirements.
- Collaborated with developers to fix design-related issues in existing projects, ensuring pixel-perfect UI and improved usability.

CloudWapp Technologies

Web Designer

August 2024-December 2024

- Managed website deployment and updates on live servers, ensuring seamless functionality.
- Designed and maintained responsive websites using HTML, CSS, and JavaScript
- Used FileZilla for efficient file transfers and server management, troubleshooting server-related issues as needed.

InfoSparkles IT Solution

May 2023 - May 2024

Web Designer

- Designed and developed responsive websites using HTML, CSS, JavaScript, Bootstrap, JQuery, React. js.
- Collaborated with backend developers to integrate frontend components with REST APIs.
- Worked on various frontend tasks using React which included logic building, updating the existing code as per the need.

LIVE PROJECT

•Tourysta Project

<https://tourysta.com/>

Designed and developed a dynamic platform for tour package suppliers to showcase and sell their products and destinations. Implemented user friendly features for visitors to book tours, view detailed information, and track order statuses seamlessly within their account.

•Qbit42 AI

<https://qbit42.ai/>

Built a complete AI assistant interface from scratch, designing conversational UI flows, crafting clean chat screens, and implementing dynamic input panels. Ensured the layout was fully responsive for mobile and desktop, improving usability and overall user experience.

•FRS Project

<https://frs.bestpeers.com/en>

Face Recognition System – Implemented a computer-vision-based attendance system featuring real-time face detection, identity matching, and automated punch-in/punch-out recording. Designed smooth UI workflows and optimized the detection process for accuracy and speed.

•AIM Project

<http://65.2.9.94:3000/login?organizationName=>

Developed an army-focused dashboard system featuring an admin panel, data tables, and a fully responsive UI. Built key modules using **HTML, CSS, Bootstrap, and React.js**, ensuring smooth navigation, role-based access, and clean data presentation for operational use.

•Starbay Project

Contributed to the development of Starbay Gaming, a React-based Project. Utilized HTML, CSS, Bootstrap, JavaScript, and Material UI to create an engaging user interface and interactive components. Worked on designing and implementing features for gaming applications, ensuring a seamless user experience.

•Seeya Project

<https://dev.seeyafit.co.il/administrator/login>

Designed and developed the Edit Training Plan module and Coach Meetings section for fitness coaches, enabling them to create and customize workout routines for clients. Used HTML, CSS, JavaScript, and jQuery to create interactive and user-friendly interfaces. Contributed to the optimization of UI elements and workflows to improve usability for gym professionals..

PERSONAL PROJECT

•Covid-19 Live Tracker App:-

Developed a web application using ReactJS and real-time API to track COVID-19 statistics. Users can input the name of a country, and the app displays key information such as active cases, recovered cases, today's cases, deaths, and confirmed cases. The intuitive interface provides users with up-to-date pandemic data at their fingertips

•Weather App :-

Built a responsive weather application with ReactJS that offers real-time weather information for various cities. The app fetches and displays weather details based on user-entered city names using API integration. The application delivers quick and accurate weather updates, ensuring users stay informed about current weather conditions effortlessly

TRAINING / INTERNSHIP

- **React Js (web designer)** Html CSS JavaScript Bootstrap React js Training from **infoviaan Technology** .
- Introducing S3 and Exploring Data using Athena organized by: AWS User Group indore .
- 5 Day workshop in Soft Skill and its role in Placements by Arnav Mishra organized by **RGPV Bhopal**

CERTIFICATIONS

* Web Designing certification by Infoviaan Technology.
